

PROPERTY OF ISLAYY

General Maintenance

Given that we provide approximately 2 extra inches of hair, we suggest that you have your stylist trim the ends, especially if you plan on doing a lot of heat styling.

Hot tools can contribute to split ends, shortening the life of your extensions.

Shampoo and condition with a moisturizing sulfate free shampoo and conditioner weekly to maintain softness and manageability.

ISLAYY will be releasing hair care products in 2017, so be sure to stay current and up to date with whats happening on ‘

WWW.ISLAYY.CO.UK. Our products are sulfate free, moisturizing, and infused with French Argan Oil.

The shampoo gently cleanses, replenishes vital moisture, and maximizes shine.

The conditioner provides hydration without weighing down the hair.

It is suggested that you visit your stylist regularly to have your hair and extensions shampooed, especially when wearing a sewin installation. It is critical that hair is properly cleansed and dried.

Hair extensions should not be handled rigorously and should always be shampooed in a downward motion.

Keep styling products to a minimum to prevent weighing down the hair.

French Argan Oil may be used as a deep conditioning treatment to maintain the smooth and lustrous texture of the hair.

It also works as a heat protectant. Use a dime size before blow drying, flat ironing or curling.

To revitalize wave pattern:

- Spray with water
- Use paddle brush to detangle
- Distribute product evenly
- Scrunch
- Allow to air dry or use diffuser for more volume.
- Handling the hair during the drying process can cause frizziness.
- If a fuller look is desired, wait until hair is completely dry to manipulate.
- * Product Suggestions: French Argan Oil; “AS I AM” Curl defining crème, spray, mousse, etc.
- Please note: Curl defining products are more effective when applied to wet hair.
- Mix these products with our French Argan Oil to maintain softness and manageability.
